

GMSS – CRM

Tender (Tender title – sub product – Move under tag after tag assigned)	Tag = Product (Sub product – auto save under Tag)	GMSS - Vendor/ Manufacturer (Tag –(Product) is saved in their category)
--	---	--

Note: (overview: that how to create tags and how to map with GMSS - Vendor)

Tender:

a. Log In:

IREPS - Indian Railways E Procurement System

GEM – Government E Marketplace

- b. Get 20 days due Tenders list as per given format.
- c. Upload tenders in CRM ☐
- d. Shortlist by Nikhil Sir / Nishant Sir ☐
- e. Upload & Check NIT ☐
- f. Documents uploaded: move tender for Document Upload by Nikhil Sir / Nishant Sir (we can add fields for upload docs as per requirement of documents – it can be 10 or 20 or more) ☐
- g. Then move or tagging – By Nikhil Sir / Nishant Sir ☐

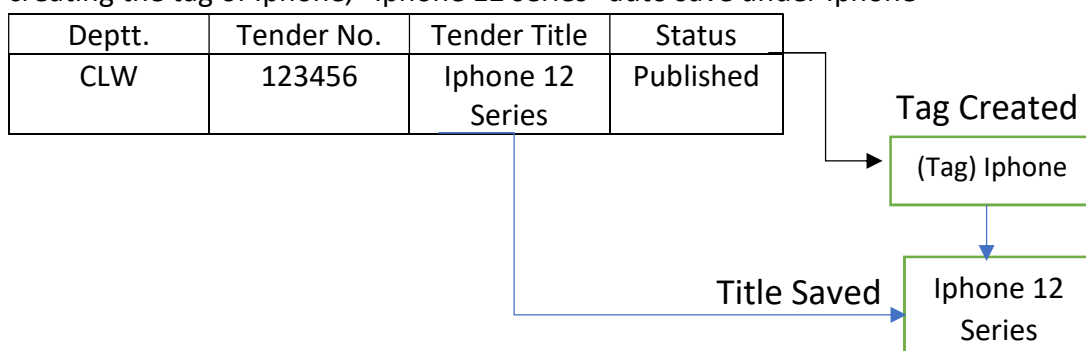

Note: (Description: Team members are required to log in to their respective portals and Download tenders for upcoming 20 days, following the specified format. This data must then be uploaded into the CRM system. Only those tenders that have been shortlisted by Nikhil Sir / Nishant Sir should be considered for further processing. For each of these shortlisted tenders, Team members must upload the Notice Inviting Tender (NIT) document.

Once the NITs are uploaded, Nikhil Sir / Nishant Sir will review them again and further filter the tenders. The tenders selected after this review will then proceed to the Document Upload stage. At this stage, there should be an “Add (+)” option that allows Team members to insert multiple rows and attach various documents as required for each tender. After all necessary documents have been uploaded, the tender moves to the final stage of tagging, which will be carried out by Nikhil Sir / Nishant Sir.)

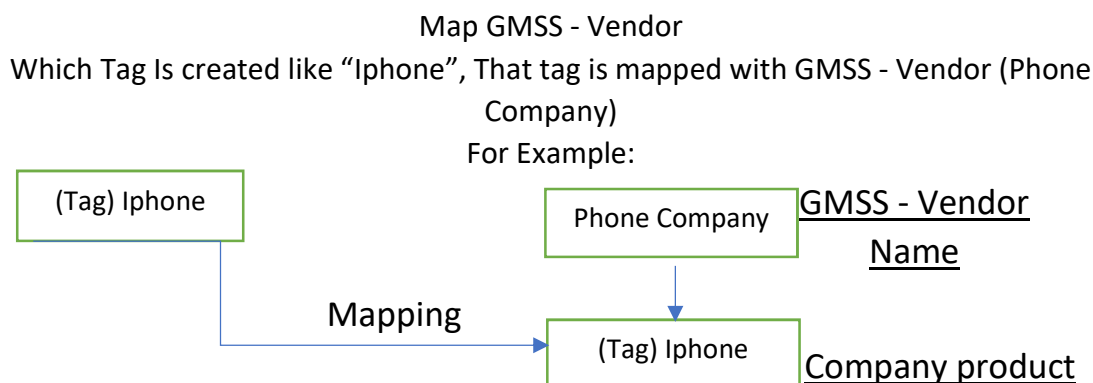

TAGGING

During Tagging – Nikhil Sir / Nishant Sir create Tags on the product Name and whenever Nikhil Sir / Nishant Sir tags any tender, then that Tender title should auto save under the Tag list.

For Example: Tender received with “Iphone 12 series” and “Iphone” Tag is created. After creating the tag of Iphone, “Iphone 12 series” auto save under Iphone

Note: (Description: During Tagging Nikhil Sir / Nishant Sir, create a tag with product name and we want tender title (which is related product series) save under the created Tag)

Note: (Description: In the Map GMSS - Vendor section, the created tag (based on Product) should be mapped to the GMSS - Vendor's / Manufacturer- Direct Supply to Railway category.)

1. Follow – Up

Tender mail will be auto initiate to GMSS - Vendors and Manufacturer- Direct Supply to Railway.

Further call, message, email to GMSS - Vendors and Manufacturer- Direct Supply to Railway follow their interest regarding tenders. - Team members

Move Tender for Tender Preparation and Participation

Note: (Description: At this stage, there are three types of companies: **1. Final, 2. Interested, and 3. New.** After the tender is tagged, an automated email is sent — **Final and Interested** companies receive the tender mail, while **New** companies receive both the tender mail and a GMSS introduction mail. Following this, Team members follow up to determine which companies are interested.

For **Final companies** that show interest, the Team member requests and uploads the quotation, along with company-supported and tender-related documents. An **“Add (+)” option** is required to upload multiple documents with their details (document names). The Team member ensures all required documents are uploaded. Once complete, Nikhil Sir / Nishant Sir reviews the quotation. If approved, the Team member verifies whether an **EMD (Earnest Money Deposit)** is required. If yes, payment details and payment source are recorded. Then, the Team member requests Financial, Technical, or both tabulations from the company as needed. In the case of manufacturers, the Team member guides them on uploading quotations, documents, EMD details, and tabulations, all of which Nikhil Sir / Nishant Sir will review.

For **Interested companies**, the process is similar, but in addition, the Team member must request and upload a tie-up agreement from the company.

For **New companies**, the Team member first shares the GMSS proposal, then requests and uploads the tie-up agreement. The rest of the process follows as with Interested companies.

If any company is not interested, the Team member records the reason and discusses it with Nikhil Sir / Nishant Sir. If the company remains uninterested, remarks are added: **Final and Interested** companies are retained with remarks, while **New companies** are discarded.)

2. Tender Preparation and Participation

1. GMSS - Vendor –

- a. Quote Received - Checked by Nikhil Sir / Nishant Sir (if Yes) ☐
- b. Ask for Financial /Technical or both (As per requirement) Tabulations ☐
- c. Tabulations Checked by Nikhil Sir / Nishant Sir ☐
- d. If Yes – Participate in Tender / If No – Reason update ☐

2. Manufacturers –

- a. Ask for Financial /Technical or both (As per requirement) Tabulations ☐
- b. Tabulations Checked by Nikhil Sir / Nishant Sir ☐
- c. If Yes – Participate in Tender / If No – Reason update ☐

Move Tender for Order Follow -Up

Note: (Description: In the Tender Preparation and Participation process, the reviewing authority (referred to as "Nikhil Sir / Nishant Sir ") first evaluates the quotations submitted by various companies to determine their suitability for the tender. If a company is found suitable, the concerned Team member requests the necessary tabulations—financial, technical, or both—from the company. These tabulations are then reviewed by Nikhil Sir / Nishant Sir to ensure they align with the requirements of the tender. If the tabulations meet the specified criteria, the GMSS - Vendor is approved to participate in the tender. In the case of manufacturers or MANUFACTURER- DIRECT SUPPLY TO RAILWAYS (Original Equipment Manufacturers), Nikhil Sir / Nishant Sir directly reviews

their tabulations, and if they are deemed suitable, the Manufacturer- Direct Supply to Railway is also allowed to participate in the tender.)

5. Order Follow Up

Same Step – GMSS - Vendor and Manufacturer- Direct Supply to Railway

a. Coordinate with Tender Officer:

Office Name

Contact: Phone & Email

Remarks and follow up every 5-7 days till received LOA or Purchase Order.

b. EMD (Earnest Money) Return/Collection: Received or Not

Receiving details: Date, amount, advice no

Move Tender for Order Processing

Note: (Description: In the Tender Follow-up process, the same procedure is followed for both GMSS - Vendors and MANUFACTURER- DIRECT SUPPLY TO RAILWAYS. The responsible Team member coordinates with the concerned tender officer until the Purchase Order (P.O.) or Letter of Acceptance (LOA) is received. During this period, the Team member maintains regular follow-up and records the officer's details, including name, contact information, and follow-up remarks. Once the P.O. or LOA is confirmed, the Team member then initiates and follows up on the return of the EMD (Earnest Money Deposit), ensuring all related remarks are documented until the EMD is successfully returned. Upon receipt, the Team member is required to share the EMD receiving details, such as the advice number, date, and amount.)

6. Order Processing

GMSS - Vendor		Manufacturer- Direct Supply to Railway	
(P.O) Order Upload / entry in excel Security Deposit – Yes / NO Time Period For S.D (Due in days & month)-		(P.O.) Order Upload / entry in excel Commission Payment (if Agreement terms – part of payment on Purchase order) Security Deposit – Yes / NO Time Period For S.D (Due in days & month)-	
YES	NO	YES	NO

Fill Purchase Order (PO) Details Follow order delivery – According the Deadlines (check upto 60 due days) GMSS – Release Purchase order to GMSS - Vendor (need pop window to Generate PO, after Submit – PO Auto mail to GMSS – vendor) Follow up delivery date and remarks		Fill Purchase Order (PO) Details Follow order delivery – According the Deadlines (check upto 60 due days) GMSS release Commission Bill (if Agreement of Payment) Follow up delivery date and remarks Follow up - till confirmation of delivery	

Follow up - till confirmation of delivery ☐ If Pending – Need Extension or Not ☐ Extension (if) – Create Delivery Extension request to department ☐ Dept. details ☐ Follow up related officer (Details) ☐ for decision (Y/N) ☐ If Extension Accept- release Modification ☐ Advise (Extension Letter): Upload & details ☐ If Not - Reason – Tender Stop ☐ Late Delivery Charges Applicable: Y / N ☐ Late Delivery by: GMSS / GMSS - Vendor ☐ New Delivery Date: ☐	Extension (if) – Create Delivery Extension request to department ☐ Dept. details ☐ Follow up related officer (details) ☐ for decision(Y/N) ☐ If Extension Accept – release Modification ☐ Advise (Extension Letter): Upload & details ☐ If Not - Reason – Tender Stop ☐ Late Delivery Charges Applicable: Y / N ☐ Late Delivery by: Manufacturer ☐ New Delivery Date: ☐
---	--

Move to Inspection

Note: *(Description: Order Processing: After receiving the Purchase Order (P.O.), the Team member is responsible for uploading the P.O. and entering its details in the P.O. Excel Sheet. Next, the Team member checks whether a Security Deposit is required, as indicated in the P.O. If required, the Team member prepares the Security Deposit and records the relevant details, such as DD, FDR, Bank Guarantee, or NEFT. If no Security Deposit is needed, the Team member proceeds directly to filling in the P.O. details. A minimum delivery deadline of upto 60 due days is selected, and GMSS releases the P.O. to the GMSS – Vendor through software (When a team member initiates PO release, a small window opens to fill details, and upon submission, an auto - PO email is sent to the related GMSS-vendor). The Team member must then follow up with the company until delivery confirmation is received. In case the delivery is delayed and the GMSS - Vendor requests an extension, the Team member prepares a Delivery Extension Request to the concerned department and shares the department and officer details, along with the officer's decision (approved or rejected). If the extension is approved, the officer issues a Modification of Advice (MOA) or Extension Letter. The Team member must upload the MOA and enter its details, including whether Late Delivery Charges (LDC) are applicable. If applicable, the Team member identifies whether the delay is the fault of GMSS or the GMSS - Vendor and updates the new delivery date. If the extension is not approved, the Team member documents the reason and the tender process is considered closed.*

In the case of MANUFACTURER- DIRECT SUPPLY TO RAILWAYS, after uploading the P.O. and making the entry in the Excel sheet, the Team member checks whether Commission Payment is required as per the agreement (if a partial payment is mentioned in the P.O.). If yes, the Team member initiates the request for Partial Payment. If not, the Team member proceeds to check if a Security Deposit is required. If a deposit is required, the Team member must guide the company on how to submit it. If not, the Team member fills in the P.O. details, selects upto 60 due days delivery deadline, and GMSS releases the Commission Bill Invoice (if applicable as per the agreement). The remaining process, including delivery follow-up, extension handling, MOA uploading, and LDC applicability, follows the same steps as with GMSS - Vendors.)

7. Inspection

Same Step for GMSS - Vendor and MANUFACTURER- DIRECT SUPPLY TO RAILWAY

IF 3rd Party inspection is required (Inspection Agency given in Purchase Order)
Place Call on Railway Inspection Portal and arrange third party inspections
(TPI) and Share the details like officer name and contacts and their Schedule
of visit

- Inspection done
- Upload Inspection Certificate and details

Move to Dispatch and Delivery

Note: (Description: Inspection: If an **inspection requirement** is mentioned in the Purchase Order (P.O.), the same process is followed for both **GMSS - Vendors** and **MANUFACTURER-DIRECT SUPPLY TO RAILWAYS**. The Team member must first confirm whether **inspection is required** by selecting "Yes" or "No." If inspection is **required**, the Team member refers to the **Third-Party Inspection (TPI)** Agency details already mentioned in the P.O., contacts the assigned inspection agency through Railway Inspection Portal, and arranges the inspection schedule accordingly. The Team member must document and share the **TPI officer's name, contact information, and scheduled date of visit**. Follow-up is maintained until the inspection is successfully completed. Once completed, the **Inspection Certificate** must be uploaded, and all relevant details shared. If inspection is **not required**, the process moves directly to the **Order Dispatch** stage.)

8. Dispatch and Delivery

Same Step for GMSS - Vendor and MANUFACTURER- DIRECT SUPPLY TO RAILWAY

1. Purchase Invoice – From Company and release Payment
2. GMSS Provide following documents
 - a. Sales Invoice
 - b. Eway Bill
 - c. E- Dispatch
 - d. Warrantee Certificate
 - e. Batch test reports
 - f. 3rd party inspection report
 - g. Material test report
 - h. Packing Details
 - i. Work Test Certificate
3. Dispatch order – follow up till delivery to customer and share delivery date and details
4. Tracking details: Courier / Logistic Company: name and contact, POD No., Consignment NO.
5. Proof of Delivery from Consignee (Goods Receiving Note (GNR)/ Lorry Receipt (LR)/ Courier Proof): Upload and details
6. Late Delivery Charges Applicable: Y / N (Auto Select – from previous selection)

If yes:

(Fill) Given (%) X (Fill) Railway Purchase order Value = LDC Amount (Auto calculated)

(Fill) Actual Delivery date – (Fill) Original PO Delivery date = total days / 7
=Total weeks x LDC calculated Amount = Total cost

Share (LDC) Late Delivery Charge Invoice and Details and confirm payment received

7. Receipt Note (R/Note) – Follow up for Receipt Note from Customer and details

Move to Warrantee Rejections

Note: *(Description: The **Dispatch and Delivery** process is the same for both **GMSS - Vendors** and **MANUFACTURER- DIRECT SUPPLY TO RAILWAYS**. Once the **delivery confirmation** and **inspection certificate** are received, the Team member requests the **Purchase Invoice** from the company. In response, **GMSS** provides all required documentation to the company, including the **Sales Invoice, E-Way Bill, E-Dispatch, Warranty Certificate, Batch Test Reports, Third Party Inspection Report, Material Test Reports, Packaging Details and Work Test Certificate**. And (+) Add option for more rows). After receiving these documents, the company proceeds to dispatch the order. The Team member then follows up until the **customer receives the delivery and upload and filled Courier details Like: Courier / Logistic Company: name and contact, POD No., Consignment No.** Upon confirmation of delivery, the Team member records the **delivery date and relevant details**.*

*At this point, the system checks whether **Late Delivery Charges (LDC)** are applicable, as auto-selected in the earlier Order Processing stage. If **LDC is applicable**, the Team member uses the following calculation method:*

(Fill) Given (%) X (Fill) Railway Purchase order Value = LDC Amount (Auto calculated)

(Fill) Actual Delivery date – (Fill) Original PO Delivery date = total days / 7 =Total weeks x LDC calculated Amount = Total cost

*The Team member then generates the **LDC Invoice**, shares the invoice and payment details with the company, and confirms receipt of payment. Following this, the Team member continues follow-up for the **Receipt Note** from the customer, and once received, the Team member records and shares the Receipt Note details to close the delivery process.)*

9. Warrantee Rejections

Same for GMSS - Vendor and MANUFACTURER- DIRECT SUPPLY TO RAILWAY

Warrantee rejection Applicable: Y/N Reason:

If Yes: Warrantee rejection Advice upload and No.

PO Number and Date:

Invoice No. and Date:

Name of Company:

Consignee Name:

Consignee Number:

Warrantee Time (months/ Days):

Intimation: Action Required in 1 Week

Follow to Material Supplied Company for: align Engineer or Direct Dispatch substitute product

(If) Dispatch	(If) Engineer Align
Share Dispatch details	Engineer Details: Name, Contact, Email Engineer Visit: date and time Engineer Report: Joint Report upload

Product: Replaceable / Rectifiable:
 Within (free time): 60 days ☐ Above 60 days ☐
 Running Bill Deduction: y/n ☐ (Auto select from previous row)
 Consignee Letter: Rejection Withdrawal Letter upload ☐
 and Recovery Refund letter: upload ☐
 (If Yes) Supplementary Invoice Generate From IREPS: upload ☐
 Follow up for Payments on Issue bill from Consignee ☐

Move to Bill Submission and Payments

Note: (*Description: The **Warranty Rejection** process applies equally to both **GMSS - Vendors** and **MANUFACTURER- DIRECT SUPPLY TO RAILWAYS**. The Team member first selects whether **Warranty Rejection is applicable**—Yes or No. If **not applicable**, the process moves to the next section. If **applicable**, the Team member must enter the **reason for rejection** and upload the following mandatory details: **Warranty Rejection Advice Number, P.O. Number and Date, Invoice Number and Date, Name of the Company, Consignee Name, and the Warranty Period** (in months/days). The system automatically notifies the Team member that **action is required within one week**.*)

*The Team member then coordinates with the material-supplying company to either **arrange for an engineer's visit** or to **directly dispatch the substitute product**. If the company dispatches the replacement product directly, the Team member records and shares the dispatch details and proceeds to the next step. If an **engineer visit** is arranged, the Team member must enter the **engineer's name, contact information, and visit details (date and time)**. After the inspection, a **joint report** is prepared by the engineer, which the Team member uploads along with its details.*

*Next, the Team member determines whether the product is **replaceable** or **rectifiable**, and selects whether the corrective action will be completed **within 60 days** or **beyond 60 days**, as any delay beyond 60 days may lead to deductions. The system then automatically checks whether **deduction is applicable** (based on previous selections).*

- If **deduction is not applicable**, the consignee issues a **Rejection Withdrawal Letter (RWL)** and a **Recovery Refund Letter (RFL)**. The Team member must follow up until both documents are received and upload them to the system.*
- If **deduction is applicable**, the Team member requests the **RWL** and **RFL** from the consignee and then generates a **Supplementary Invoice** via the **IREPS Portal**, addressed to the consignee. The invoice and its details must be uploaded, and the Team member follows up for payment under the issue bill.)*

10. Bill Submission and Payments

GMSS - Vendor	Manufacturer- Direct Supply to Railway
1. Bill & Bill related Documents upload at Portal ☐	1. Bill & Bill related Documents Guide to upload at Portal ☐
2. Follow up for Payments in 07 to 10 days ☐ Tender related department details ☐ Officer Name and Contact Details ☐	2. Follow up for Payments in 07 to 10 days ☐ Tender related department ☐ Officer Name and Contact Details ☐
3. Payment release ☐	3. Payment Release ☐
4. Release Security Deposited	4. GMSS Provide Commission Invoice ☐

SD related department details ☐ Officer Name and Contact Details ☐		5. Commission release ☐ 6. Release Security Deposited SD related department details ☐ Officer Name and Contact Details ☐		
Full Payment	Deduction	Full Payment	Partial Payment	Deduction
Full payment received, ☐ Payment details share to accounts ☐	Company Fault: Provide Debit Note ☐ GMSS Fault: share details to accounts and enter loss/ Rebate/ Discount/ Other Charges in back dates. MD Approval ☐	Full payment received, ☐ Payment details share to accounts ☐	Share Details – follow up for Payments ☐ Payment received, share details to Accounts ☐	Reason of deductions ☐ If any dispute – resolve them ☐ Payment received, share details to Accounts ☐

End The tender - Now Call for new GMSS - Vendor Establishments

Note: *(Description: Bill Submissions and Payments: In the Bill Submissions and Payments section, the Team member is responsible for uploading the Bill and all bill-related documents to the official portal. The system should allow an “Add (+)” option for adding multiple rows, enabling the Team member to attach various documents and input corresponding details. Each row must include an option to indicate whether the document has been uploaded to the portal (Yes/No).*

After submission, the Team member follows up with the **payment-related department**, maintaining and sharing complete details including the **department name, officer name, and contact information**. Once payment is processed, the Team member checks whether the **full payment** is received or if there are any **deductions**.

- If **full payment** is received, the Team member shares the payment details with the **accounts department** for record and closure.
- If there is any **deduction**, the Team member identifies and records the **reason for the deduction**:
 - If the deduction is due to a **GMSS - Vendor’s fault**, GMSS raises a **Payment Invoice** to the GMSS - Vendor for the deducted amount. Once the GMSS - Vendor clears the payment, the Team member updates and shares the details with the accounts team.
 - If the deduction is due to a **GMSS fault**, the Team member submits the deduction details to accounts as a **backdated loss/ Rebate/ Discount/ Other Charges entry with MDs Approval**.

In parallel, the Team member must coordinate with the **Security Deposit Department** to initiate and follow up on the **release of the Security Deposit**. Once the deposit is released, the Team member shares the relevant details with the **accounts team**.

For **MANUFACTURER- DIRECT SUPPLY TO RAILWAYS**, the Team member is responsible for **guiding the company** in preparing the bill and uploading all required documents. The Team member follows up with the **tender-related department** for payment processing. Upon successful release of the payment by the department, GMSS issues a **Commission Invoice** to

the **MANUFACTURER- DIRECT SUPPLY TO RAILWAY**. The Team member must also follow up for the **release of the Security Deposit**, providing the department and officer details.

Once the **Commission Payment** is released, the Team member verifies the type of payment received:

- If **full payment** is received, payment details are shared with the accounts team.
- If **partial payment** is received, the Team member follows up for the **remaining amount**, and once received, shares the complete payment details with accounts.
- If **deductions** occur, the Team member records and shares the **reason for the deduction**. In case of any **dispute**, the Team member coordinates with **Nikhil Sir / Nishant Sir** to resolve the matter. After the **MANUFACTURER- DIRECT SUPPLY TO RAILWAY** clears any due payments (if applicable), the Team member must ensure all payment details are properly documented and shared with the **accounts department**.)

Software Features Required

1. Countdown Watch on every Screen – Tender Due Date Management

- **Feature:** Countdown timer for each selected tender's due date and time.
- **Display:** Live countdown visible on the dashboard for active tenders.
- **Silent Options** (to pause or stop countdown):
 -  **Filled Tender** (submission completed)
 -  **Not Interested in Tender** (mandatory reason required)
 -  **Due Date Extended** (update date/time, restart countdown)

2. Pop-Up Alerts on every Screen – Pending Financial Actions

- **Pop-ups on Dashboard** for:
 -  **Pending Payments**
 -  **Due Security Deposit Releases**
- **Purpose:** Alerts team to financial actions requiring follow-up.

3. General Search Functionality

- **Search Parameters:**
 - Tender Number
 - Tender Title
 - GMSS – Vendor Name
- **Results Displayed Section-Wise:**

-  Emails
 -  Follow-ups
 -  Chats
 -  Uploaded Documents
 -  Internal Notes or Logs
-

4. GMSS – Vendor Management Search

- **Search Options:**
 -  **Vendor Name** – Opens a pop-up with full vendor profile:
 - Contact Info, Product Tags, Tender History, Status
 -  **Tag (Product Category)** – Lists all vendors associated with that tag
-

5. Work Assignment Modules (Cross-Platform)

5.1 Email Assignment

- **Assigned By:** Nikhil Sir / Nishant Sir
 - **Features:**
 - Assign emails to specific team members
 -  Priority levels: High, Medium, Low
 - Replies sent from same official email thread
 - Notifications sent to assigned team member
-

5.2 Ticket / To-Do Section

- **Function:** Internal task management system
 - **Assigned By:** Nikhil Sir / Nishant Sir or authorized users
 - **Features:**
 - Task Title, Description
 - Priority Selection
 - Auto Status: **Open → In Progress → Closed**
 - Notifications on assignment and completion
-

5.3 Chat Assignment via WhatsApp Integration

- **Concept:** Single **official WhatsApp number** integrated in the software
- **Features:**
 - View all WhatsApp chats within the software interface
 - Assign chat threads to team members with:
 -  Task Notes

-  Priority Level
 - Internal comment thread for each chat
- **Optional:** Auto-create task/ticket from chat

 Integration via **WhatsApp Business API, Twilio, or etc** to maintain single-number control

6. Dialler Integration (Non-Cloud, Software Integrated)

- **Requirement:** Dialler that works locally (on-premise), integrated with software
-

7. Courier Tracking Module

- **Purpose:** Track incoming and outgoing courier records
- **Features:**
 - Record **courier dispatch** and **receiving dates**
 - Enter **courier company, AWB / tracking number**
 - Maintain logs for:
 - ☒ Sent documents/packages
 - ☒ Received documents/packages
 - Optional: Upload courier receipt or proof of delivery
